

## Step 8 - Enroll Advocates

Many of your customers will immediately enroll after you have presented them with this opportunity, or after they have weighed all the facts.

If you are with them when they decide to enroll, both of you get online and go to your replicated website provided you by Consumer First. Type in your web address along with your ID# and enroll them. This will be part of your initial training.

They may also mail in the application if they want to. Go to Forms and Tools in the Consumer First website.

Use the website to enroll if at all possible. This will speed up everything, and show you that they are on the cutting edge.

When they enroll, have them study all the tools afforded to them at the Consumer First website, then have them go to the [www.acceleratethedream.com](http://www.acceleratethedream.com) website. Have them click on "Fast Start" and follow the steps. This will show them exactly how to get started in their new business.

Now you will become a sponsor and upline contact for your new team members. Duplicate this process over and over again. Duplication is the key. This is what you teach all your downline team members.

Don't forget, each time they or their enrollees use their credit cards, you earn money.
